

Appl. No. 10/669,041
Response dated July 28, 2008
Reply to Office Action of March 26, 2008

REMARKS/ARGUMENTS

The specification has been amended to change the title of the invention and the ABSTRACT title to the title suggested by the Examiner on page 3, paragraph 6 of the Action.

Claims 1-8 have been cancelled and new claims 9 and 10 added.

Initially, Applicant wishes to direct the Examiner's attention to page 2, paragraphs 3 and 4 of the Action in which the Examiner's objects to various informalities and typographical errors in the disclosure and claims. Applicant has reviewed the hard copy of the originally filed application and these errors are NOT present. Nor does it appear that the "numerous errors that recurred throughout various pages of the specification and various claims", as stated by the Examiner on page 3, paragraph 5 of the Action are present in the hard copy of the application. Applicant therefore respectfully requests that the Examiner make sure that the Examiner's copy is a faithful copy of the originally mailed application and, if not, revise the Action accordingly.

On page 12, paragraph 31 of the Action, the Examiner states that "Claim 8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, and minor objections set forth in this Office action."

On page 12, paragraph 32 of the Action, the Examiner states that "Claim 7 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, and minor objections set forth in this Office action and to include all of the limitations of the base claim and any intervening claims."

New claims 9 and 10 have been drafted to satisfy the Examiner's requirements above and therefore should be allowable.

Applicant reserves the right to prosecute canceled claims 1-8 in a continuation application.
